Veterinary Medicines Authority**

**PERMIT TO ALLOW EMERGENCY USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF TOMATO BROWN RUGOSE FRUIT VIRUS ON FARM
EQUIPMENT AND PROTECTED CROPPING AREAS**

PERMIT NUMBER – PER95515

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 28 MARCH 2025 TO 31 MARCH 2027

Permit Holder:

BIOSECURITY SA – PLANT HEALTH OPERATIONS
33 Flemington Street
GLENSIDE SA 5065

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

VIROCID BROAD SPECTRUM DISINFECTANT (APVMA No. 86445)

PLUS OTHER REGISTERED PRODUCTS

Containing: 170 g/L ALKYLDIMETHYLBENZYLAMMONIUMCHLORIDE,
107 g/L GLUTARALDEHYDE,
78 g/L DIDECYLDIMETHYLAMMONIUMCHLORIDE as the only active constituents.

RESTRAINTS

DO NOT use in the presence of food-producing crops

Directions for Use:

Situation	Rate	Application Requirements
Disinfection of equipment (including irrigation equipment), non-porous and hard porous surfaces (concrete) exposed to Tomato Brown Rugose Fruit Virus	1 % solution (1:100 dilution)	The surface being treated must remain wet for the full exposure time of 1 hour. Re-application may be required in fast drying conditions

Critical Use Comments:

- Thoroughly clean all surfaces before treatment.
- Apply to farm equipment or surfaces as a drench or spray using knapsack or powered sprayer.
- Use a sufficient spray volume to wet the entire surface of the equipment and surfaces.
- The surface being treated must remain wet for the full exposure time of 1 hour.

Re-Entry Directions:

DO NOT re-enter treated areas for 2 hours after surface disinfection.

If prior entry is required, wear all personal protective clothing, including gloves and respirator, as recommended in the product safety directions on the label.

DO NOT come into contact with treated surfaces for 30 minutes after the full exposure time has elapsed.

First Aid Warning

WARNING - Contains glutaraldehyde which may cause asthma and/or respiratory and/or skin sensitisation. Sensitive workers should avoid contact with this substance.

Jurisdiction:

All States and Territories.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.
